Company name Ditra Software S.r.l.

Year of establishment 2022

Sector Software/Healtcare/Pharma

Activity DITRA SOFTWARE is an innovative startup, academic spin-off of the University of Turin. The activity consists in the development, production and marketing of a modern Cloud SaaS platform for the medical/health sector, with the aim of radically simplifying the distribution, management, reporting and tracking of medical products along their entire supply chain. distribution. The platform is designed for maximum security, capable of operating in multiple public clouds, and is multi-tenant, multi-product, multi-functional and multi-language to provide maximum flexibility and the ability to expand the value that can be delivered. Functionally, it offers a number of core services such as agile ERP, reporting and analytics, logistics and automation, GIS mapping, proactive communications, as well as AI/Machine learning. All services are accessible via web portal and eCommerce services, for customers and partners, via web browser, native mobile apps, as well as REST APIs for further extensibility and integration with other platforms and apps.

Products / Services. Ditra Platform. Pay per use subscription system profiled according to the customer characteristics through which you access a set of customizable services.

Applications. The initial offer focuses on the management and distribution of medical devices and addresses the problem of "lost devices", the cause of significant costs for all parties involved in the distribution chain with negative impacts not only for the private sector but also for patients and the National Health System.

Reference market. Ditra's cloud-native platform provides comprehensive digital transformation and business management services to a variety of companies and organizations in the healthcare sector, including:

- Pharmacy
- Healthcare providers
- Hospitals/clinics
- Laboratories
- Supply chain
- Government agencies
- Beyond Healthcare

Relevant university University of Turin, Department of Management
