What is EFSET?

The EFSET programme is designed to support your studies and help you gain the knowledge and skills needed to address challenges in our global food system. You will learn practical ways to improve your critical and creative thinking skills, interdisciplinary working, and how to use these effectively in your future career.

EFSET builds upon the approach of IFSTAL (Interdisciplinary Food Systems Teaching and Learning programme), an extensively tested food systems training programme in the United Kingdom with four years of experience and over 1,500 participants. We are now expanding this approach to food systems training to European universities as part of the EIT Food network.

You can engage as much as you want with the programme. It's completely free, flexible and voluntary, and the more you put in, the more you get out.

Join our interdisciplinary community

- A free, voluntary and flexible programme designed to enhance your studies and provide cutting-edge food systems learning.
- Interact with students from different disciplines, universities and countries to explore diverse perspectives on food systems at exciting workshops.
- Attend a fully funded international Away Weekend and Summer School.
- Participate in collaborative group work on real-world case studies and food system challenges created with industry partners.
- Enhance your CV by learning a range of practical skills that will raise your profile and support you in becoming an effective food system change agent.

Open to all postgraduate students enrolled at participating universities. Please contact your local educational coordinator for more information:

University of Reading,
Dr Harley Pope
h.a.n.pope@reading.ac.uk

University of Hohenheim,
Tetiana Pavlenko
