Visiting Professor Program Academic year 2020/2021

DEPARTMENT OF MANAGEMENT

TEACHING COMMITMENT: 35 hours

COURSE TITLE

Managerial Accounting

TEACHING PERIOD

2nd term

SCIENTIFIC AREA

Business economics

LANGUAGE USED TO TEACH

English

The Degree Course is entirely taught in English

COURSE SUMMARY

The course aims to study the logic, the responsibility centres and the tools of the management control in the enterprises, with particular attention to the manufacturing ones. The purpose of the course is to provide students with the knowledge and understanding about the mechanisms of the managerial system, useful to guide and empower managers to the global objectives of the firm, side by side in an initial capacity to apply this knowledge and understanding in simple practical case studies. The course enables the graduate to acquire the necessary skills to his/her joining the company, where through the study and understanding of all business processes, will become a figure of reference for the activities of management control and support to operational managers in their decision making. The course also allows the graduate

who will specialize in some other area of management to acquire the basic skills for programming and monitoring of its actions in key economic and financial.

LEARNING OBJECTIVES

At the end of the course student is expected to be capable of:

- knowing and understanding the logic of management control as a directional process and its mechanisms and technical – accounting tools;
- applying knowledge about the management control logic and tools to the planning, budgeting and reporting issues;
- making judgements to critically analyse the issue and selected solutions discussed in the business cases study;
- using communication skills to discuss in the classroom the business cases studied in the individual and team work, using appropriate supports;
- using learning skills to verify ongoing the learning degree of the managerial logic, also and in particular through the business cases study and discussion.

ADDITIONAL COURSE

COURSE TITLE

Financial Accounting and Business Administration

TEACHING PERIOD

2nd term

SCIENTIFIC AREA

Accounting

LANGUAGE USED TO TEACH

English

The Degree Course is entirely taught in English

COURSE SUMMARY

The aim of the course (Financial Accounting part) is to develop a basic knowledge about financial accounting tools and methodologies. The purpose is to provide practical knowledge for analysing, measuring and recording business transactions (bookkeeping techniques), as well as providing the basic

understanding of their communication/reporting throughout corporate financial statements. Students need to understand that accounting is the language of business, and it can help to communicate and assess the performance of an organisation. The Visiting Professor will have to teach only the first class of this entire course (i.e. intro, aims, and scope of financial accounting, accounting equation, and introduction to main financial statements).

LEARNING OBJECTIVES

After attending the lectures, having prepared the assignments/homeworks and having passed the written exam, the student will achieve the following learning outcomes:

1. Start developing independent judgment of business facts.
2. Being able to identify and assess the key variables which are the base of a business or an organisation.
3. Ability to analyse a business transaction and its financial measurement and communication.
4. Record a business transaction on the main accounting books (ledger and journal).
5. Understand the impact of business transaction on financial reports and been able to prepare them in their basic forms (balance sheet, income statement, cash flow statement).
6. Identify key variables in assessing and judge the financial performance of a business.
