Visiting Professor Program Academic Year 2024/2025

TEACHING COMMITMENT: 20 hours

COURSE TITLE

Human Anatomy

TEACHING PERIOD

2nd term

SCIENTIFIC AREA

Human Anatomy

LANGUAGE USED TO TEACH

English

COURSE SUMMARY

The course is aimed at teaching the basis of the central and peripheral nervous system, and in particular the sensory organs and the central pathways.

LEARNING OBJECTIVES

Students will learn about the anatomy of the PNS, CNS, somatosensory and motor pathways and central pathways, to make connections to be able to link anatomy to neurology and neurosurgery cases.

We will be conducting dissections on cadaver parts.

VISITING PROFESSOR PROFILE

The candidate should have extensive experience in teaching human anatomy, in particular direct teaching with medical students classes. Neuroscience research activity is a plus since the candidate will be teaching neuroanatomy. Expertise in hands-on dissection is required.
