

Visiting Professor Program Academic Year 2023/2024

TEACHING COMMITMENT: 12 hours

COURSE TITLE

Sustainability Analysis of Conservation Programs

TEACHING PERIOD

2nd term

SCIENTIFIC AREA

Zoology

LANGUAGE USED TO TEACH

English

COURSE SUMMARY

Conservation of biodiversity and sustainable development in marginal areas.

Analysis of problems, strategies and tools adopted in insular contexts, in areas characterized by very fragile climatic situations.

Analysis of the situation in Mauritius and in other economically fragile contexts of the Indian Ocean.

LEARNING OBJECTIVES

Acquisition of tools and techniques useful for the planning and evaluation of sustainable conservation projects.

TUTORSHIP ACTIVITIES

N/A

LAB ACTIVITIES

N/A

OTHER ACTIVITIES BESIDES THE COURSE

2 seminars addressed to PhD students and research fellows during the stay in Torino.

VISITING PROFESSOR PROFILE

The successful candidate should be a scholar with an interdisciplinary approach to conservation, including basic knowledge of zoology, botany, legislation and economics. The successful candidate should know how to approach sustainable development and climate change-related conservation in small island and in developing countries.
