

UNIVERSITÀ DEGLI STUDI DI TORINO

ID

VP24_DIP_NEUR

Visiting Professor Program Academic year 2020/2021

DEPARTMENT OF NEUROSCIENCES

TEACHING COMMITMENT: 12 hours

COURSE TITLE

Neuropharmacology

TEACHING PERIOD

1st term

SCIENTIFIC AREA

Pharmacology

LANGUAGE USED TO TEACH

English

COURSE SUMMARY

Neuropharmacology of synaptic transmission in the central nervous system.

LEARNING OBJECTIVES

To get insights into mechanism of action of neuroactive compounds of clinical relevance.

TUTORSHIP ACTIVITIES (IF APPLICABLE)

LAB ACTIVITIES (IF APPLICABLE)

OTHER ACTIVITIES (IF APPLICABLE)

The visiting professor will held a seminar at the Neuroscience Institute of Cavalieri Ottolenghi Foundation, Department of Neuroscience.

VISITING PROFESSOR PROFILE DESCRIPTION

Researcher with outstanding publication records and international reputation, teaching experience of Undergraduate, Graduate and Medical students. Experience in neuropharmacology of synaptic transmission and neural circuitry, complex behaviors. Experience in multiple approaches ranging from biochemistry and histology to slice and cell neurophysiology is also appreciated.
