Visiting Professor Program Academic year 2021/2022

DEPARTMENT OF DRUG SCIENCE AND TECHNOLOGY

TEACHING COMMITMENT: 16 hours

COURSE TITLE

Applied Pharmacoeconomics

TEACHING PERIOD

2nd term

SCIENTIFIC AREA

Pharmaceutical and technological applications of chemistry

LANGUAGE USED TO TEACH

English

COURSE SUMMARY

Examples of application of pharmacoeconomics principles, methods, and theories in real world environments, to assess the value of pharmaceutical services and health products.

Analysis and discussion of examples taken from international literature.

LEARNING OBJECTIVES

During the course the students will learn to critique and apply pharmacoeconomic methods as they relate to cost-minimization, cost-effectiveness, cost-utility, and cost-benefit to improve clinical decision making.

TUTORSHIP ACTIVITIES

N/A

LAB ACTIVITIES

N/A

OTHER ACTIVITIES BESIDES THE COURSE

Seminars addressed to students of post graduate school of hospital pharmacy.

VISITING PROFESSOR PROFILE

Candidates should have research experience in pharmaceutical economics and health technology assessment, should be authors of publications and reports in the field, and should have previous teaching experience.
