Visiting Professor Program Academic year 2019/2020

DEPARTMENT OF SURGICAL SCIENCES

TEACHING COMMITMENT: 40 hours

The Visiting professor will teach in two different courses.

COURSE TITLE

Audiology and Phoniatrics II

TEACHING PERIOD

2nd term

SCIENTIFIC AREA

CLINICAL SCIENCES

LANGUAGE USED TO TEACH

English

COURSE SUMMARY

Communication physiology and pathological modifications in voice, swallowing, speech and language disorders.

Tools for the removal of barriers to communication and environmental communication.

The course provides an in-depth description of the structure of linguistic messages.

LEARNING OBJECTIVES

Harmonizing basic education, developing and maintaining high professional standards and, in due time, facilitating cross borders exchange of knowledge and professional figures, are essential elements for the future growth of speech therapy in Italy.

TUTORSHIP ACTIVITIES

Tutors are considered one of the main strengths of our Faculty: the scope of this role is to guide the students through their training, to help them put in to practice and widen their acquired knowledge, while fostering an active participation to their academic growth.

According to the above stated principle, our university course complies with the guidelines regarding the Minimum European Educational Standards set by the CPLOL and with those set by the IALP (International Association of Logopedics and Phoniatrics), concerning the Education for Speech and Language Pathologists. Our faculty also participates to the Net-Quest European project regarding speech therapists standards of education and harmonizing basic education of SLT.

LAB ACTIVITIES

Organization and coordination of Intervention Programme for languages diseases and voice troubles.

OTHER ACTIVITIES BESIDES THE COURSE

Seminars and conferences with PhD students and doctors interns.

Activities of laboratories for the implementation of rehabilitation techniques.

ADDITIONAL COURSE

COURSE TITLE
Audiology and Phoniatrics III

TEACHING PERIOD

2nd term

SCIENTIFIC AREA

CLINICAL SCIENCES

LANGUAGE USED TO TEACH

English

COURSE SUMMARY

Auditory physiology and pathological modifications in voice, speech and language disorders.
Tools for the removal of barriers to communication and environmental communication.

LEARNING OBJECTIVES

Harmonizing basic education, developing and maintaining high professional standards and, in due time, facilitating cross borders exchange of knowledge and professional figures, are essential elements for the future growth of audiologists in Italy.

TUTORSHIP ACTIVITIES

Tutors are considered one of the main strengths of our Faculty: the scope of this role is to guide the students through their training, to help them put in to practice and widen their acquired knowledge, while fostering an active participation to their academic growth.

The description of the speech sounds will be addressed on articulatory, acoustic and auditory bases, by introducing the concept of phonological category and by discussing the definition of perceptual boundaries during language acquisition or learning.

LAB ACTIVITIES

Organization and coordination of Intervention Programme for deafness diseases.

OTHER ACTIVITIES BESIDES THE COURSE

Seminars and conferences with PhD students and doctors interns.
activities of laboratories for the implementation of rehabilitation techniques.

VISITING PROFESSOR PROFILE

The visiting professor must be assistant professor associated professor or full professor in activity in a university not italian.

The visiting professor must have a speech therapist profile with a high professionalism in this field.
