ID

VP40\_DIP\_BIOS

## Visiting Professor Program Academic year 2019/2020

**DEPARTMENT OF LIFE SCIENCES AND SYSTEMS BIOLOGY**

**TEACHING COMMITMENT: 16 hours**

### **COURSE TITLE**

Evolution of Behaviour

### **TEACHING PERIOD**

1st term

### **SCIENTIFIC AREA**

Anthropology

### **LANGUAGE USED TO TEACH**

English

### **COURSE SUMMARY**

Genetic Bases of Vocal Communication

### **LEARNING OBJECTIVES**

Understanding the neuro-genetic mechanisms underlying the evolution and encoding of speech and language by studying key language-related traits such as vocal learning.

### **OTHER ACTIVITIES BESIDES THE COURSE**

2 seminars addressed to PhD students and research fellows

1 dissemination conference

**VISITING PROFESSOR PROFILE**

A researcher that leads a Research Group or Unit that studies vocal communication and its genetic bases in mammals or other vertebrates, in an evolutionary perspective.

**CONTACT PERSON AT THE DEPARTMENT**

Marco Gamba
