Visiting Professor Program Academic year 2022/2023

TEACHING COMMITMENT: 16 hours

COURSE TITLE

Industrial Economics (graduate level)

TEACHING PERIOD

2nd term

SCIENTIFIC AREA

Industrial Economics

LANGUAGE USED TO TEACH

English

COURSE SUMMARY

The course surveys major topics in the field of Industrial Organization, with an emphasis on competition policy, oligopoly theory and empirical applications. The course uses insights from economic theory and econometrics to approach relevant policy issues. The analytical knowledge that the student will derive from the course is useful for further study of firms and markets, as well as to evaluate the effects of economic regulation and competition policy.

LEARNING OBJECTIVES

At the end of the course, the student will be able to:

1. Apply economic theory and econometrics to real world problems, for example in the area of competition policy;
2. Understand how price and non-price competition affects the behavior of firms and consumers;
3. Understand key issues related to government regulation of product markets.

The student will learn to integrate and apply economic theory and econometrics to solve empirical problems, which may be relevant for competition policy cases, firms' strategic decisions, or government regulation. The student will familiarize with the use of data and statistical software (Stata) to address economic problems.
