## Visiting Professor Program Academic year 2022/2023

**TEACHING COMMITMENT:** 12 hours

### COURSE TITLE

**RADIOLOGY AND NUCLEAR MEDICINE**

### TEACHING PERIOD

2nd term

### SCIENTIFIC AREA

Interventional Radiology

### LANGUAGE USED TO TEACH

English

### COURSE SUMMARY

The course will provide information on indications and technical aspects of radiological and nuclear medicine examination as well as interventional procedures.

The lectures that will be held by the visiting professor (VP) will focus on interventional procedures for the treatment of liver malignancies both primary (HCC) and secondary (oligometastatic setting).

### LEARNING OBJECTIVES

At the end of the course Students will become familiar with the best ways to appropriately select and prescribe radiological and nuclear medicine examinations, for specific diseases and other clinical issues.

At the end of the lectures held by the VP, students will have learnt the basics of the clinical setting of the early and intermediate stage of HCC as well as of the oligometastatic setting. Technical knowledge of percutaneous and transarterial treatments will be also evaluated.

### TUTORSHIP ACTIVITIES

N/A

## **LAB ACTIVITIES**

N/A

## **OTHER ACTIVITIES BESIDES THE COURSE**

A seminar on interventional oncology will be provided by the VP to the radiology residents of the University of Torino.

---

## **VISITING PROFESSOR PROFILE**

Associated or full Professor of Radiology/interventional radiology of distinguished international Institutions with high expertise in the interventional oncology field.
