Visiting Professor Program  
Academic year 2022/2023

TEACHING COMMITMENT: 12 hours

COURSE TITLE  
RADIOLOGY AND NUCLEAR MEDICINE

TEACHING PERIOD  
2nd term

SCIENTIFIC AREA  
Interventional Radiology

LANGUAGE USED TO TEACH  
English

COURSE SUMMARY  
The course will provide information on indications and technical aspects of radiological and nuclear medicine examination as well as interventional procedures. The lectures that will be held by the visiting professor (VP) will focus on interventional procedures for the treatment of liver malignancies both primary (HCC) and secondary (oligometastatic setting).

LEARNING OBJECTIVES  
At the end of the course Students will become familiar with the best ways to appropriately select and prescribe radiological and nuclear medicine examinations, for specific diseases and other clinical issues. At the end of the lectures held by the VP, students will have learnt the basics of the clinical setting of the early and intermediate stage of HCC as well as of the oligometastatic setting. Technical knowledge of percutaneous and transarterial treatments will be also evaluated.

TUTORSHIP ACTIVITIES  
N/A
LAB ACTIVITIES
N/A

OTHER ACTIVITIES BESIDES THE COURSE
A seminar on interventional oncology will be provided by the VP to the radiology residents of the University of Torino.

VISITING PROFESSOR PROFILE
Associated or full Professor of Radiology/interventional radiology of distinguished international Institutions with high expertise in the interventional oncology field.
